DIRECT TARGET GROUPS

Students in initial vocational training of fourth year classes (EQF 3) and recent graduates (EQF 4) of the technical and professional courses of the tourism and catering sectors and related and/or complementary sectors of the Consortium schools, located in **Tuscany** and **Marche** regions.

INDIRECT TARGET GROUPS

1. Schools and VET providers (other students, trainers, tutors, VET staff), families, civil society.
2. Chambers of commerce, trade associations, social partners, businesses.
3. Policy makers and local, regional, national and European institutions with competence in VET.

VETLAB 2024

In line with the objectives of the European strategic documents "**European Skills Agenda for Sustainable Competitiveness, Social fairness and Resilience**" and "**European Education Area**", through the **VETLAB 2024** project, the **VET Accreditation Consortium**, coordinated by **Istituto di Istruzione Superiore "Bandini"** of **Siena**, aims to **improve the quality of education and vocational training**, giving a European dimension to training courses and providing young participants with the opportunity to verify and improve their curricular skills: professionalism in the areas of belonging (**digital and sustainable tourism, hotel and catering and similar and/or complementary sectors**), **key and transversal skills, cultural knowledge and linguistic preparation.**

Through the creation of

personalized international mobility paths for **students in initial vocational training of fourth classes** and **recent graduates** of the 6 IFP schools of the Consortium, the VETLAB 2024 project therefore aims to create figures with technical-professional, creative and relational skills, capable of **innovating, in a green and digital way, the tourism and catering sector and other similar and/or complementary sectors** and having a greater impact on the final value of the products and services offered.

Other objectives of the project are:

- Qualify the young participants through an international practical internship that makes them more competitive and employable on the local and international job market and enhance on-the-job learning moments as real moments of training and growth;
- Enable participants to manage

their own training and invest it in the creation of innovative activities in the tourism and catering sectors and in other similar and/or complementary sectors;

- Promote the comparison and transfer of good training practices, connecting our VET system with the training and work system of other European realities.

These general and specific objectives are pursued through a mobility experience in **Malta** and **Spain** of variable duration: **from 15 to 30 days for the student target** (VET-short mobility) and **90 days for the recent graduates target** (VET-long ErasmusPro mobility).

In line with the inclusive policies of the Erasmus+ programme and with the Erasmus Plan of the VETLAB Consortium, the project also provides for the involvement of **participants with special needs and fewer opportunities.**
